Ontario Hospital Services Commission

1965 Annual Report
(Statistical Supplement)

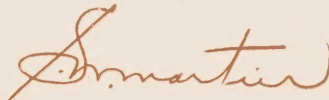

FOREWORD

The Annual Report of the Ontario Hospital Services Commission for 1965 is issued in two parts. The first part provides a synopsis of the activities of the Commission during 1965 and indicates some of the more significant trends in hospital utilization and the experience of the Plan. The second part, or Statistical Supplement, contains detailed information about each hospital, particularly, in terms of the amount of utilization and the current cost of providing necessary services.

The information found in the Statistical Supplement is derived principally from data supplied by the hospitals on their Annual Returns, as required under the terms of the Federal-Provincial Agreement. The morbidity tables constitute the one exception, as they are compiled from the hospital admission-separation forms which were processed by the Commission in 1965. Reference to the text and footnotes appearing at the end of each table is important, as they will clarify factors that are not immediately apparent from a cursory view of the data.

An acknowledgement is also due to the hospitals and the staff of the Commission, particularly the Research and Statistics Division, for the co-operative effort in producing this Annual Report.

A handwritten signature in dark ink, appearing to read "S. W. Martin". The signature is fluid and cursive, with the first name "S." and last name "Martin" clearly distinguishable.

S. W. MARTIN, F.C.I.S., F.A.C.H.A.,
Chairman and General Manager.

HOSPITAL HIGHLIGHTS—1965

A. FACILITIES AND SERVICES

The purpose of the Statistical Supplement to the 1965 Annual Report is to present particulars about the use made of hospital services and the associated costs of those hospitals and nursing homes operating under the jurisdiction of the Ontario Hospital Services Commission.

The small tables (A to K) that are interspersed in the next few pages afford a comparison of the volume of patients treated and their lengths of stay, the utilization being made of hospital beds and services, and the prevailing trends in hospital staffing. Table L summarizes the total financial responsibility of the Commission with respect to services provided in all hospitals and nursing homes approved under the Plan.

With the exception of the information on morbidity (Tables 15-17), all statistical and financial data in this Supplement were derived from the edited and certified Annual Returns received from hospitals and related facilities. The morbidity data were accumulated from hospital admission-separation forms processed and tabulated in 1965.

The basic format of Tables 1-23 in the 1965 Supplement is substantially the same as that appearing in last year's Statistical Supplement. While the public hospitals still appear in order of their total rated bed size, their listing by location is not identical to last year's, as many hospitals have since made changes in their bed capacities. Consequently, the use of the alphabetic index at the end of this report is essential to find data about specific public hospitals quickly and easily. Instructions concerning its use have been placed on page 138, the reverse side of the index divider.

The Statistical Supplement is organized under seven main headings:

Public Hospitals (active, convalescent and chronic hospitals and units)	Tables 1-10
Private Hospitals	Tables 11, 12
Federal Hospitals	Table 13
Nursing Homes Temporarily Approved for Chronic Care	Table 14
Morbidity Data	Tables 15-17
Financial Data Pertaining to Public Hospitals	Tables 18-23
Index to Public Hospitals	Pages 137-141

All tables listing individual public hospitals (Tables 1-6, 9, 10, 18-23) are arranged in terms of six groupings listed below, with the hospitals within each group arranged in descending order of bed size.

1. All group A (general teaching) hospitals, except those listed in group 2 below, which are shown separately because of their specialized nature.
2. Hospital for Sick Children and The Princess Margaret Hospital, both in Toronto.
3. Groups B and C (general) hospitals.
4. Group D (Red Cross Outpost) hospitals.
5. Group E (convalescent) hospitals.
6. Groups F and G (chronic) hospitals.

The above arrangement, particularly where general hospitals are concerned, permits the consolidation of all information relating to a particular item of interest into one Table. It should be noted that in addition to totals for particular bed-size classifications, the following summaries according to level of care have also been provided.

- (1) Group A hospitals less Hospital for Sick Children and The Princess Margaret Hospital.
- (2) All Group A hospitals combined, grand total only.
- (3) Groups B and C hospitals, 100 beds and over.
- (4) Groups B and C hospitals, under 100 beds.
- (5) Groups B and C hospitals, all sizes combined.
- (6) Groups A, B and C hospitals combined.
- (7) Group D hospitals.
- (8) Groups A to D hospitals combined, grand total only.
- (9) Group E hospitals.
- (10) Groups F and G, individually and combined.
- (11) Groups A to G combined, grand total only.

Table 5, relating to Diagnostic Radiology, has been slightly changed this year with the addition of full-time equivalent technicians. When relating Table 9 to Tables 20 and 21, cognizance should be taken of a difference in the calculation of per diem rates. The rates for Table 9 were based on total adult and child days plus one-quarter of newborn days, while the calculations in Tables 20 and 21 were based on total adult and child days only. Total days in both cases would include days of care in convalescent and/or chronic units attached to public general hospitals.

This Supplement does not contain any particulars about tuberculosis sanatoria, Ontario Hospitals for the mentally-ill, private hospitals for the mentally-ill or retarded, or those units in Federal hospitals providing domiciliary and long-term mental care.

Hospital Accommodation in Ontario

Actual construction of new hospital facilities and renovation of older hospital areas declined in 1965, but the amount of planning in the drawing board stages increased considerably. The total beds available at the end of 1965 was 45,190, representing a net increase of 596 or 1.3 per cent over 1964. Relatively, the growth in active treatment including psychiatric beds was largest, amounting to 4.9 per cent.

TABLE A

Type of Bed	Total Rated Bed Capacity at Dec. 31, 1965	% Increase or (Decrease) in Beds 1965/64	Number per 1,000 Eligible Population ¹			
			1962	1963	1964	1965
Public and Private Hospitals						
Active treatment	33,679	1.8	4.9	5.0	5.0	5.0
Psychiatric (short-term and intermediate)	662	3.1	.1	.1	.1	.1
Convalescent care including rehabilitation	1,151	(14.3)	.1	.2	.2	.2
Chronic Care ²	7,094	2.0	1.0	1.0	1.1	1.1
All levels of care	42,586	1.3	6.1	6.3	6.4	6.4
Federal Hospitals and Nursing Stations						
All levels of care	2,604	1.3	.4	.4	.4	.4
TOTAL, all levels of care	45,190	1.3	6.5	6.7	6.8	6.8

The net increase of 620 active treatment beds in public general hospitals resulted from additional wings being built on several existing hospitals, plus the construction of replacement and new hospitals. Public hospitals were replaced at Lion's Head, Mount Forest and Seaforth, and a new one, the Glengarry Memorial, was established at Alexandria. Footnote 14 to Table 1 on Page 10 lists those hospitals that completed building or renovation programmes involving 10 beds or more in 1965.

The trend in recent years has been to treat mentally-ill patients requiring short-term or intermediate care in a general hospital setting. As a result, the establishment of psychiatric units in general hospitals is being carefully co-ordinated with a programme to reduce the active treatment load currently being handled by the Ontario (public mental) Hospitals. In 1965, the psychiatric units of public general hospitals contained 662 beds.

¹ Eligible population is defined to be the total provincial population (6,731,000) less armed forces personnel, members of the R.C.M.C. and inmates of Federal penal institutions. 1960001: Population figures are quoted as of June 1 and based on Dominion Bureau of Statistics' estimates.

² Includes temporarily approved nursing homes.

The decline in public convalescent beds was the result of re-classifying 192 existing beds to provide 13 active treatment beds at Henderson General Hospital in Hamilton, and 179 chronic beds at Riverdale Hospital in Toronto.

Three new units, providing additional beds for the chronically-ill, were completed in 1965. In addition, the unit for chronically-ill patients in Parry Sound was transferred from the Parry Sound General to St. Joseph's Hospital. The re-classification of 179 beds at Riverdale Hospital for use by the chronically-ill and a reduction of beds in nursing homes temporarily approved for chronic care, accounted for the net gain of 138 beds assigned to chronic care.

One new private hospital of 20 beds opened in 1965, and one ceased to operate under the Plan. Lady Dunn General Hospital in Wawa converted from private to public hospital status as of July 1st, 1965. These changes accounted for the difference of 4 beds in the total bed capacity of all private hospitals.

Little change was reported by Federal hospitals in the number of beds available for insured patients. Sunnybrook Hospital still continued to lease 43 beds to Wellesley Hospital for the treatment of rheumatic and arthritic patients, until the latter's construction programme is completed.

The bed ratios in Table A have been based on eligible population. Since "Federal" beds are not included in the Commission's planning formulae¹, it will be seen that the number of available beds, at 6.4 per 1,000 population, are within Commission planning standards.

Volume of Hospital Care

As will be seen in Tables B, C, D and E, the utilization of all hospitals and nursing homes continued to show increases in 1965 in most areas, although at a generally lower rate than that experienced in 1964.

In Table B, Parts I and II, small increases will be noted for 1965 in almost every section. Because of the growth in population and the increase in the number of beds available in those regions where there was a shortage of beds, a rise in the number of days of care could be expected. As in 1964, the relatively low occupancy rate in hospitals providing convalescent care again reflects that not all of the available beds were in operation in 1965.

TABLE B

Part I

	<i>Patients Under Care</i>				<i>Days of Care</i>			
	<i>Total for 1965</i>	<i>% Increase or (Decrease)</i>			<i>Total for 1965</i>	<i>% Increase or (Decrease)</i>

<i>Federal Hospitals and Nursing Stations</i>								
All levels of care	23,681	1.4	1.4	(1.7)	641,026	(2.9)	(.6)	1.7
TOTAL, all levels of care ..	1,083,880	3.9	3.1	1.2	13,805,787	3.3	3.8	2.4

¹ For a description of the planning standards used by the Commission, see Page 3 of the 1965 Annual Report of the Ontario Hospital Services Commission.

Part II

	Percentage of Beds Occupied			Admission per 1,000 Eligible Population ¹			Average Length of Stay		
	1963	1964	1965	1963	1964	1965	1963	1964	1965
<i>Public and Private Hospitals</i>									
1. Active treatment	84.1	83.3	83.7	152	153	152	10.2	10.2	10.4
2. Convalescent care	51.4	50.0	69.8	1	1	1	45.7	46.5	48.3
3. Chronic care	87.4	91.3	91.9	1	1	1	275.6	262.3	270.7
All levels of care	83.7	83.6	84.7	154	155	154	12.6	12.5	12.8
<i>Federal Hospitals and Nursing Stations</i>									
All levels of care	65.1	67.0	67.4	3	3	3	28.6	26.3	30.6
TOTAL, all levels of care ..	82.5	82.6	83.7	157	158	157	12.9	12.8	13.2

While the days of care ratios, shown in Table C, have been increasing at a declining rate since 1962 for active treatment patients, 1965 was the first year since the start of the Plan in which the days per 1,000 eligible population¹ rendered to this group have actually declined. Likewise, the percentage increases reported for 1965 for all other classifications, except convalescent care in public and private hospitals, were relatively negligible.

TABLE C

	Days of Care Per 1,000 Eligible Population ¹				Percentage Increase or (Decrease)		
	1962	1963	1964	1965	1963/62	1964/63	1965/64
<i>Public and Private Hospitals</i>							
1. Active treatment	1,514	1,551	1,572	1,569	2.4	1.4	(.2)
2. Convalescent care	31	34	38	44	9.7	11.8	15.8
3. Chronic care	350	346	355	356	(1.1)	2.6	.3
All levels of care	1,895	1,931	1,965	1,969	1.9	1.8	.2
<i>Federal Hospitals and Nursing Stations</i>							
All levels of care	104	99	96	96	(4.8)	(3.0)	---
TOTAL, all levels of care ..	1,999	2,030	2,061	2,065	1.6	1.5	.2

The total number of newborn and the volume of care they received continued to show a marked decline in 1965. The extent of this decline is shown in Table D. The average length of stay of newborn cared for in public general hospitals rose .1 day to 7.0 days in 1965. Newborn cared for in private hospitals and Federal nursing stations were hospitalized for a slightly shorter period. The definition of newborn includes healthy and sick babies who are kept in hospital from the time of their birth until their day of discharge.

TABLE D

	Newborn Under Care			Newborn Days of Care			Average Length of Stay of Newborn		
	1964	1965	% Increase or (Decrease)	1964	1965	% Increase or (Decrease)	1964	1965	% Increase or (Decrease)
<i>Hospitals in Ontario</i>									
1. Public	153,417	142,458	(7.1)	1,040,907	981,681	(5.7)	6.9	7.0	1.4
2. Private	2,619	2,395	(8.6)	16,689	15,945	(4.5)	6.5	6.8	4.6
3. Federal Nursing Stations	454	464	2.2	3,410	3,085	(9.5)	7.8	6.7	(14.1)

¹ See footnote 1, page x of this report.

The total days of care in public active treatment hospitals shown in Table E is distributed by the type of care the patients received. A consistent increase took place in all but the obstetrical service. The heading, "All other", refers mainly to care provided in convalescent and chronic care units attached to public general hospitals.

TABLE E

<i>Public Active Treatment Hospitals</i>	<i>Days by Type of Service</i>			<i>% Increase or (Decrease)</i>	
	<i>1963</i>	<i>1964</i>	<i>1965</i>	<i>1964/63</i>	<i>1965/64</i>

Diagnoses of Patients Separated from Hospital (See Tables 15-17)

The morbidity statistics in Tables 15, 16 and 17 are listed according to the Canadian List of 98 primary diagnoses. The diagnoses shown on all active treatment and convalescent admission-separation forms processed by the Commission during 1965 are shown in Tables F and 15. The breakdown of morbidity data shown in Table 16 refers to patients in hospitals and units for the chronically-ill and are grouped by major category of illness. Table 17 shows the leading causes of death in all hospitals.

In Table F the active treatment and convalescent patients separated from hospital are shown in descending order by major diagnostic grouping.

Perusal of Table 15 indicates that the ten most common conditions requiring hospitalization are (absolute number of patients are shown in brackets): maternal deliveries (143,472), hypertrophy of tonsils and adenoids (80,249), all fractures (45,863), arteriosclerotic and degenerative heart diseases (39,269), all malignant neoplasms (34,855), pneumonia (32,218), hernia of abdominal cavity (28,136), complications of pregnancy (26,202), all benign neoplasms (25,567), and diseases of gall-bladder and pancreas (22,339). Fracture of the femur had the longest average length of stay of 46.4 days. The shortest average length of stay was hypertrophy of tonsils and adenoids with 1.9 days, followed closely by diseases of the teeth and supporting structures which stayed an average of 2.2 days.

Table 16 indicates the leading primary diagnoses of patients separated from chronic hospitals in 1965. The three most common conditions treated were: vascular lesions affecting central nervous system (2,075), all malignant neoplasms (1,547), and arteriosclerotic and degenerative heart disease (1,034). Inflammatory and other diseases of the central nervous system had the longest average stay of 528.2 days. The average length of stay for all chronic patients decreased again in 1965. Since the Plan began in 1959, the average stay of chronically-ill patients cared for in hospitals has declined from 383.4 to 267.9 days in 1965.

Table 17, which is subdivided into two parts relating to (a) active treatment and convalescent hospitals, and (b) hospitals for chronic care, lists the leading causes of deaths in hospitals by broad categories.

In Part A, Diseases of the Circulatory System rank highest with 8,831 or 33.6 per cent of all deaths. Within this broad category, arteriosclerotic and degenerative heart disease accounted for

6,602 or 74.8 per cent of the deaths. Neoplasms were the second leading cause with 6,556 deaths or 25.0 per cent of the total; of these, 6,456 or 98.5 per cent were malignant. Together, arterio-sclerotic and degenerative heart disease and malignant neoplasms accounted for 49.8 per cent of all deaths occurring in active and convalescent hospitals.

In Part B, Diseases of the Nervous System and Sense Organs were the principal cause of death among chronically-ill patients. This group of diseases accounted for 1,315 or 31.6 per cent of all deaths, 1,017 of which were caused by vascular lesions affecting the central nervous system. As in Part A, neoplasms constituted the second leading cause of deaths in chronic hospitals, involving a total of 1,148 patients. Again, within this broad category of neoplasms, 1,134 or 98.8 per cent of the deaths were the result of malignant conditions.

TABLE F

<i>Active Treatment and Convalescent Hospitals</i>	<i>Number of Separations¹</i>			<i>% Total Discharges and Deaths</i>		<i>Average Length of Stay</i>	
	<i>1964</i>	<i>1965</i>	<i>% Increase or (Decrease)</i>	<i>1964</i>	<i>1965</i>	<i>1964</i>	<i>1965</i>

Special Services Provided by Hospitals

Laboratory (See Table 4)

The 1960 edition of the Schedule of Unit Values for Clinical Laboratory Procedures published by the Dominion Bureau of Statistics is used by hospital laboratories to determine the unit evaluation for each laboratory procedure. The unit represents 10 minutes of time, 7 minutes of which are allotted to technical functions and the remaining 3 minutes to stenographic services, glass washing and other non-technical services performed in the laboratory. Included in the number of units of value are some procedures that are performed mostly outside the laboratory, such as basal metabolic rates, electrocardiographs and electroencephalographs. Excluded from the count of units are all interpretive, clinical, diagnostic, consultative, teaching and research functions.

Table G indicates that the continuing rate of growth in laboratory services performed in public hospitals, while substantial, declined between 1964 and 1965, just as it did in the previous year. During 1965, the total work performed in hospital laboratories increased by 15.0 per cent as compared with 15.8 per cent in 1964 and 17.0 per cent in 1963. Most of this increase was on behalf of in-patients, who accounted for an additional 5,922,148 units of work.

¹ Includes all adults and children separated from active treatment and convalescent hospitals whose admission-separation forms were processed between January 1 — December 31,, 1965.

TABLE G

	Volume of Laboratory Services			% Increase or (Decrease)

Radiology (See Tables 5 and 6)

While the volume of diagnostic radiology performed in public general hospitals continued to increase in 1965, the growth, both in terms of examinations and films taken, was not as great as in the year before. The trends in this service since 1963 are shown in Table H.

TABLE H

				% Increase or (Decrease)	
	1963	1964	1965	1964/63	1965/64

TOTAL films taken	5,672,505	6,406,269	6,641,832	12.9	3.7

Although the number of hospitals in Ontario providing therapeutic radiology in 1965 increased to thirty-three, the number of patients and volume of treatments decreased. The average number of treatments per patient also decreased in 1965 to 8.8. The Ontario Cancer Treatment and Research Foundation continued to operate The Princess Margaret Hospital as well as seven clinics attached to public general hospitals.

Staffing of Hospitals (See Tables 7, 12, 13 and 14)

The relationship between the number of full-time and part-time hospital employees on staff at December 31 and the number of rated hospital beds available at that time is shown in Table J.

¹ Calculated on four decimal places.

TABLE J

	<i>Rated Beds % Increase or (Decrease) 1965/64</i>	<i>Employees on Staff as at December 31st</i>					
		<i>Full-time</i>			<i>Part-time</i>		
		<i>1964</i>	<i>1965</i>	<i>% Increase or (Decrease)</i>	<i>1964</i>	<i>1965</i>	<i>% Increase or (Decrease)</i>
Public Active Treatment

TOTALS	1.3	77,162	77,417	.3	12,671	12,819	1.2

Paid Hours of Work (See Tables 8 and 9)

A percentage distribution of all paid hours of work by department for public general hospitals, including the convalescent and chronic units, is shown in Table 8.

In Table 9 the paid hours of work by department are shown on a per diem basis for all public active treatment, convalescent and chronic hospitals and units. This table can be related to the data in Tables 21 and 22 pertaining to gross operating costs and salaries and wages.

Formal Training Programmes in Public Hospitals (See Table 10)

The data on training programmes for the five large para-medical groups shown in Table 10 are condensed and shown in Table K. Several programmes show substantial increases from 1964 to 1965 both in numbers enrolled and numbers graduated. The highest percentage increase in enrollment took place with Medical Record Librarians (44.4%), while laboratory technologists (58.9%) had the largest percentage increase in the number of graduates.

Two Schools of Nursing, shown in Table 10 but not in Table K, are the Nightingale and Quo Vadis Schools of Nursing. These schools respectively had an enrollment of 116 and 57 at December 31, 1965. The Nightingale School graduated 57 nurses in 1965. Since the Quo Vadis School began in 1964, its first graduation will be in 1966.

TABLE K

<i>School or Course Operated by Hospitals</i>	<i>Number of Hospitals</i>	<i>Enrollment at December 31st</i>			<i>Number that Graduated</i>		
		<i>1964</i>	<i>1965</i>	<i>% Increase or (Decrease)</i>	<i>1964</i>	<i>1965</i>	<i>% Increase or (Decrease)</i>
<i>Public General</i>							
Nurses	57	7,678	7,960	3.7	2,307	2,420	4.9

<i>Public Hospitals for the Chronically-ill</i>							
Nursing Assistants	2	41	34	(17.1)	90	76	(15.6)

¹ Includes beds and staff of convalescent and chronic units attached to public general hospitals.

² Includes beds and staff of convalescent units in chronic hospitals and chronic units in convalescent hospitals.

B. FINANCIAL DATA (Tables 18-23)

The hospital operating expenses shown in the financial tables (18 to 23) were derived from Part II of the Annual Returns (HS-2) of public hospitals and their year-end settlement forms (HF series).

During 1965 the total financial responsibility of the Commission amounted to \$345,052,365. The distribution for 1965 as compared to 1964 and 1963 is as follows:

TABLE L

	<u>1963</u>	<u>1964</u>	<u>1965</u>	<i>% Increase or (Decrease)</i>	
				<u>1964/63</u>	<u>1965/64</u>
Public Hospitals in Ontario	\$252,167,477	\$281,769,099	\$316,843,399	11.74	12.45

Readers of this Supplement are cautioned that valid comparisons can only be made with a thorough knowledge of the various number and types of administrative and other practices occurring within individual hospitals which are reflected in the data presented herein. Operating costs vary widely from hospital to hospital and are dependent upon a number of factors such as composition and layout of plant facilities, number and qualifications of staff, types of treatment given, percentage of beds occupied, the operation of a School of Nursing or other training programmes and the volume of out-patient services offered.

(1) Includes One Medical Place, Don Mills, which opened February 2, 1965. Does not include Lady Dunn General, Wawa, which became a public hospital July 1, 1965, and Grace Haven, Hamilton, which ceased to operate under the Plan April 30, 1965.

(2) The Licensed beds in the Villa Private Hospital, Thornhill, where increased from 24 to 32 for 1965.

(3) The number of beds available in Sunnybrook Hospital, Toronto, continued to be temporarily reduced by the 43 leased to Wellesley Hospital, Toronto and (b) Westminster Hospital, London, increased its rated bed capacity by 44.

(4) One nursing home was approved and five ceased to operate under the Plan in 1965.

TS—Denotes Training School for Nurses.

(1) As the amount of laboratory service performed on behalf of patients in convalescent and/or chronic units attached to public general hospitals is believed to be negligible, a lesser division seemed assured in these calculations by using only active treatment patients and days in the divisors for hospitals in Groups A to D.

(2) Hours include total paid hours for all laboratory staff (including student technologists but excluding pathologists) and not for technologists alone.

(3) Hospital has a chronic unit—see footnote 1 above. Details about size of unit, its patient load and days of care will be found in Tables 1 to 3.

(4) Hospital has a convalescent unit—see footnote 1 above. Details about size of unit, its patient load and days of care will be found in Tables 1 to 3.

(5) The Hamilton Civic Hospitals is a single corporation composed of two hospitals which have been listed separately. To obtain a complete picture of the total operation, the two need to be combined.

(6) Toronto, The Wellesley Hospital—includes laboratory services rendered to patients being treated in the arthritic unit at Sunnybrook Hospital.

(7) Alexandria, Glasgow Memorial Hospital—new hospital opened May 17, 1965.

(8) This hospital had either a significant increase or decrease in its rated bed capacity during the calendar year ending December 31, 1965. Details regarding the nature of the change appear in footnote 1, to Table 1.

(9) Those hospitals that did not report either laboratory units or hours of work in the laboratory department were not included in the related total figures for hospital groups, (i.e., bed size and alphabetic classifications) or the grand total.

(10) Hospital operates an approved course for training laboratory technologists. See Table 10 for particulars about numbers enrolled and totals graduated.

		40,467	12,735,319	161,111,892	12.1	5.1	0.6	0.3	0.5	0.6	1.0	0.5	1.0	0.4	0.2	0.2	1.2	0.1

(1) Paid hours of work per diem are based on total hours of persons employed in active, convalescent and chronic units and corresponding total adult and child days plus 1/4 newborn days.

(2) Nursing services are reported in total because of a lack of detailed uniform information about individual nursing units.

(3) Per diem for hospital with long-term care is calculated on the basis of 24 hours per day for each patient in the hospital, although amount of laboratory and radiology service given to these classes of patients is relatively negligible.

(4) Other special and supplementary services include pharmacy, physiotherapy, occupational therapy, medical records, social service, etc.

(5) Paid hours of work relating to non-allowable operating costs include special research projects, ambulance service, ancillary operations, etc. Details of work relating to non-allowable operating costs will be found in Tables 1 to 3. Tables 4 and 5 provide indicators of laboratory and radiology workloads, based on active treatment patients and days only.

(6) The hospital has a separate unit for the treatment of patients with mental illness. Details of work relating to this unit will be found in Tables 1 to 3. Tables 4 and 5 provide indicators of laboratory and radiology workloads, based on active treatment patients and days only.

(7) The hospital has a separate unit for the treatment of patients with mental illness. Details of work relating to this unit will be found in Tables 1 to 3. Tables 4 and 5 provide indicators of laboratory and radiology workloads, based on active treatment patients and days only.

(8) Paid hours for the Quo Vadis School of Nursing are excluded.

(9) Paid hours for The Nightingale School of Nursing are excluded.

(10) Paid hours for The Wellesley Hospital—would include paid hours of staff of anesthetic unit temporarily located at Sunnybrook Hospital.

(11) This hospital has a separate unit for the treatment of patients with mental illness. Details of work relating to this unit will be found in Tables 1 to 3. Tables 4 and 5 provide indicators of laboratory and radiology workloads, based on active treatment patients and days only.

(12) Details of work relating to this unit will be found in Tables 1 to 3. Tables 4 and 5 provide indicators of laboratory and radiology workloads, based on active treatment patients and days only.

									306

1. Unless otherwise noted, rated bed capacity refers to active, convalescent, and/or chronic beds. Not shown are beds in Department of Veterans Affairs hospitals assigned to accommodate committed mental patients and domiciliary patients.

2. Generally, percentage occupancies are based on rated active and chronic beds as of December 31, 1965, but in the case of Ottawa Rideau Health and Occupational Centre domiciliary beds have been included, and with Moose Factory Indian Hospital tuberculosis beds have been included, as statistics relating to corresponding days of care could not be removed.

3. Total days stay since admission for discharges and deaths.

4. Moose Factory Indian Hospital—beds for tuberculosis patients not shown in rated bed capacity, statistics however include figures relating to tuberculosis care.

5. Ottawa Rideau Health and Occupational Centre—statistics include figures relating to domiciliary care.

6. All personnel figures include those persons employed in the long-term mental, domiciliary and tuberculosis units.

7. Toronto, Sunnybrook Hospital—rated capacity declined by 43 beds in 1964, due to loan of this accommodation to The Wellesley Hospital until the latter's construction programme is completed.

17. Leukaemia and aleukaemia			204	1,567	28,637	4.2	18.3	0.2	0.2
18. Other malignant neoplasms and neoplasms of lymphatic and haematopoietic tissues			150, 152, 155-161, 164, 165, 176, 178, 179, 190-203, 205, 214-215	9,734	259,394	34.1	24.6	0.6	3.1
19. Benign neoplasm of uterus			216	8,554	88,753	13.2	10.4	0.8	0.8
20. Benign neoplasm of ovary				3,073	31,364	4.7	10.2	0.3	0.3
21. Benign neoplasm (excluding uterus and ovary) and neoplasm of unspecified nature			210-213, 217-239	13,940	108,822	16.2	7.8	1.4	1.0
III. ALLERGIC, ENDOCRINE SYSTEM, METABOLIC AND NUTRITIONAL DISEASES			240-289	3.9	361,865	58.2	14.7	1.6	3.8
22. Asthma			241	7,048	73,793	11.0	10.5	0.7	0.7
23. Other allergic disorders (excluding asthma)			240, 242-245	1,503	10,568	1.6	7.0	0.2	0.1
24. Diseases of thyroid gland			250-254	3,345	43,969	6.5	13.1	0.3	0.4
25. Diabetes mellitus			260	11,514	211,556	31.4	18.4	1.1	1.9
26. Diseases of other endocrine glands			270-277	894	12,895	1.9	14.4	0.1	0.1
27. Avitaminoses and other metabolic diseases			280-289	2,288	39,084	5.8	17.1	0.2	0.4
IV. DISEASES OF THE BLOOD AND BLOOD-FORMING ORGANS			290-299	1.0	76,149	11.3	14.2	0.5	0.7
28. Diseases of the blood and blood-forming organs			290-299	5,362	76,149	11.3	14.2	0.5	0.7
V. MENTAL, PSYCHONEUROTIC AND PERSONALITY DISORDERS			300-326	4.2	502,570	74.7	17.6	2.8	4.6
29. Psychoses			300-309	1.0	151,007	22.4	23.4	0.7	1.4
30. Psychoneurotic disorders			310-318	2.3	267,679	39.8	17.1	1.5	2.4
31. Disorders of character, behaviour and intelligence			320-326	0.9	83,884	12.5	13.0	0.6	0.8
VI. DISEASES OF THE NERVOUS SYSTEM AND SENSE ORGANS			330-398	7.3	703,389	104.5	14.3	4.8	6.4
32. Diseases of the brain, spinal cord and peripheral nerves			330-334	1.9	213,239	46.5	25.0	1.2	2.8
33. Inflammation and other diseases of central nervous system			330-339	1.7	116,411	17.1	18.8	0.8	1.4
34. Diseases of nerves and peripheral ganglia			340-349	0.5	44,078	6.5	10.7	0.3	0.5
35. Diseases and conditions of the eye			370-389	2.3	127,493	19.0	8.3	1.5	1.2
36. Diseases of ear and mastoid process			390-398	1.4	66,192	9.8	6.9	1.0	0.6

Table 15—Primary Diagnoses of Patients Separated from Active and Convalescent Hospitals in 1965 (1)—(Continued)

CANADIAN LIST NUMBER AND DIAGNOSIS (2)		I.S.C. No. (3)	Separations (4)		Days of Care for Separations (5)		Average Days Stay	Percentage Distribution	
			Total	Per 1,000 Population	Total	Per 1,000 Population		Separations (4)	Days of Care (5)
VII. DISEASES OF THE CIRCULATORY SYSTEM		400-468	87,680	13.0	1,543,084	229.3	17.6	8.5	14.0
37. Rheumatic fever and chronic rheumatic heart disease		400-469, 410-416	3,308	0.5	67,211	10.0	20.3	0.3	0.6
38. Arteriosclerotic and degenerative heart disease		420-422	39,269	5.8	826,568	122.8	21.0	3.8	7.5
39. Other diseases of the heart		430-434	6,932	1.0	119,183	17.7	17.2	0.7	1.1
40. Hypertensive heart disease and other hypertensive disease		440-447	8,125	1.2	122,601	18.2	15.1	0.8	1.1
41. Diseases of arteries		450-456	5,773	0.9	150,782	22.4	26.1	0.6	1.4
42. Varicose veins of lower extremities		460	8,836	1.3	98,784	14.7	11.2	0.9	0.9
43. Haemorrhoids		461	7,532	1.1	68,120	10.1	9.0	0.7	0.6
44. Phlebitis and thrombophlebitis		463-464	2,472	0.4	41,436	6.2	16.8	0.2	0.4
45. Other diseases of the circulatory system		462, 465-468	5,433	0.8	48,399	7.2	8.9	0.5	0.4
VIII. DISEASES OF THE RESPIRATORY SYSTEM									
46. Acute upper respiratory infections		470-475	161,639	24.0	941,144	139.8	5.8	15.7	8.6
47. Influenza		470-475	16,291	2.4	96,766	14.4	5.9	1.6	0.9
48. Pneumonia		480-483	2,933	0.4	20,552	3.1	7.0	0.2	0.2
49. Bronchitis		490-493	32,218	4.8	379,553	56.4	11.8	3.1	3.4
50. Hypertrophy of tonsils and adenoids		500-502	15,517	2.3	150,453	22.3	9.7	1.5	1.4
51. Other diseases of respiratory system		510	80,249	11.9	154,160	22.9	1.9	7.8	1.4
		511-527	14,431	2.2	139,660	20.7	9.7	1.4	1.3
IX. DISEASES OF THE DIGESTIVE SYSTEM									
52. Diseases of the teeth and supporting structure		530-587	133,513	19.8	1,392,674	206.9	10.4	13.0	12.7
53. Ulcer of stomach, duodenum and jejunum		530-535	7,580	1.1	16,377	2.4	2.2	0.7	0.1
54. Gastritis, duodenitis and other disorders and diseases of the stomach and duodenum		540-542	14,494	2.1	231,875	34.4	16.0	1.4	2.1
55. Appendicitis		543-545	5,757	0.8	50,677	7.5	8.8	0.6	0.5
56. Hernia of abdominal cavity		550-553	18,044	2.7	131,951	19.6	7.3	1.8	1.2
57. Intestinal obstruction without mention of hernia		560-561	28,136	4.2	237,757	35.3	8.5	2.7	2.2
58. Gastro-enteritis and colitis except ulcerative, age 4 weeks and over		570	3,449	0.5	46,527	6.9	13.5	0.3	0.4
59. Chronic enteritis and ulcerative colitis		571	14,805	2.2	107,464	16.0	7.3	1.4	1.0
60. Cirrhosis and other diseases of liver		577	4,578	0.7	75,321	11.2	16.5	0.5	0.7
61. Diseases of gall-bladder and pancreas		580-583	2,412	0.4	50,824	7.6	21.1	0.2	0.5
62. Other diseases of digestive system		584-587	22,339	3.3	320,767	47.7	14.4	2.2	2.9
		536-539, 573-578	11,919	1.8	123,134	18.3	10.3	1.2	1.1
X. DISEASES OF THE GENITO-URINARY SYSTEM									
63. Nephritis and nephrosis		590-593	89,696	13.3	805,269	119.7	9.0	8.7	7.3
64. Infections of kidney		590-594	2,898	0.4	49,732	7.4	17.2	0.3	0.5
65. Calculi of kidney, ureter and other parts of urinary system		600	7,131	1.1	82,071	12.2	11.5	0.7	0.7
66. Other diseases of urinary system		602, 604	6,663	1.0	63,593	9.5	9.5	0.6	0.6
67. Hyperplasia of prostate		601, 603, 605-609	12,388	1.8	120,672	17.9	9.7	1.2	1.1
68. Redundant prepuce and phimosis		610	6,378	0.9	120,034	17.8	18.8	0.6	1.1
69. Diseases of ovary, Fallopian tube and parametrium and infective disease of uterus, vagina and vulva		615	2,792	0.4	8,543	1.3	3.1	0.3	0.1
70. Uterovaginal prolapse		622-626, 630	13,719	2.0	92,559	13.8	6.7	1.3	0.8
71. Disorders of menstruation		631	7,896	1.2	113,766	16.9	14.4	0.8	1.0
72. Other diseases of genital organs		634	12,521	1.9	50,370	7.5	4.0	1.2	0.5
		611-614, 616, 617, 620, 621, 632, 633, 635-637	17,310	2.6	103,929	15.4	6.0	1.7	0.9
XI. DELIVERIES AND COMPLICATIONS OF PREGNANCY, CHILDBIRTH AND THE PUERPERIUM									
73. Complications of pregnancy		640-689	188,427	28.0	1,119,599	166.3	5.9	18.4	10.2
74. Abortion		640-649	26,202	3.9	114,906	17.1	4.4	2.5	1.0
75. Delivery without mention of complications		650-652	17,165	2.6	61,974	9.2	3.6	1.7	0.6
76. Delivery with specified complications		660	104,546	15.5	603,886	89.7	5.8	10.2	5.5
77. Complications of the puerperium		670-678	38,926	5.8	329,177	48.9	8.5	3.8	3.0
		680-689	1,588	0.2	9,656	1.4	6.1	0.2	0.1

XII. DISEASES OF THE SKIN AND CELLULAR TISSUE	690-716	17,088	100,100	24.0	9.4	1.0
	78. Infection of the skin and subcutaneous tissue	7,589	58,880	7.8	7.8	1.0
	79. Other diseases of skin and subcutaneous tissue	9,499	102,252	10.6	10.6	1.0
XIII. DISEASES OF THE BONES AND ORGANS OF MOVEMENT	720-749	36,152	613,539	91.2	17.0	1.1
	80. Arthritis and rheumatism, except rheumatic fever	13,320	272,009	40.4	11.2	1.1
	81. Displacement of intervertebral disc	6,793	131,779	19.6	19.6	1.1
	82. Other diseases of bones and organs of movement	16,039	209,751	31.2	13.1	1.1
	730-734, 736-738, 740-749					
XIV. CONGENITAL MALFORMATIONS	750-759	9,603	125,876	18.7	13.1	1.1
	83. Congenital malformations	9,603	125,876	18.7	13.1	1.1
XV. CERTAIN DISEASES OF EARLY INFANCY	760-776	2,541	31,721	4.7	12.5	0.3
	84. Certain diseases of early infancy	2,541	31,721	4.7	12.5	0.3
XVI. SYMPTOMS, SENILITY AND ILL-DEFINED CONDITIONS	780-795	19,745	133,443	19.8	6.7	1.1
	85. Symptoms, senility and ill-defined conditions	19,745	133,443	19.8	6.7	1.1

SOURCE: Admission-Discharge Forms processed between January 1, and December 31, 1965.

- (1) These statistics include: (a) All Ontario residents hospitalized in public and private hospitals in Ontario;
 (b) Insured Ontario residents hospitalized in out-of-province hospitals;
 (c) Out-of-province residents hospitalized in public and private hospitals in Ontario;
 (d) Patients hospitalized in Federal hospitals for whom O.H.S.C. was responsible.

(2) A Canadian List of 98 diagnoses selected as a basis for study by provincial hospital insurance programmes.

(3) International Statistical Classification of Diseases, Injuries and Causes of Death, 1955 Revision.

(4) Includes all patients who were discharged from or died in hospital.

(5) Includes days of care accrued to all patients who were discharged from or died in hospital.

(6) Newborn definition was changed in 1964 and consequently all newborn are now excluded from these statistics.

* In addition there is an approved convalescent rate equivalent to the chronic rate.

(1) Includes operating costs for Convalescent Unit.

(2) Includes operating costs for Convalescent Unit.

(3) Amounts reported above reflect hospital submission prior to approval of final settlement but incorporate any known adjustments pertaining to prior years.

(A) Toronto, St. Joseph's—The Quo Vadis School of Nursing is included.

(B) Toronto, New Mount Sinai—The Nightingale School of Nursing is included.

(C) Toronto, The Princess Margaret—The major proportion of expenditures relate to research and care of out-patients.

(D) Alexandria, Glengarry Memorial opened May 17, 1965.

(E) Wawa, Lady Dunn General changed from a Private Hospital to a Public Hospital July 1, 1965.

* Does not represent depreciation, but the purchase of furniture and equipment on an outright basis.

(1) Includes operating costs for Chronic Unit.

(2) Includes operating costs for Convalescent Unit.

(3) Amounts reported above reflect hospital submission prior to approval of final settlement but incorporate any known adjustments pertaining to prior years.

(4) The salary and wage percentage of gross operating costs is 66.54.

(A) Toronto, St. Joseph's—The Quo Vadis School of Nursing is included.

(B) Toronto, New Mount Sinai—The Nightingale School of Nursing is included.

(C) Toronto, The Princess Margaret—The major proportion of expenditures relate to research and care of out-patients.

(D) Alexandria, Glangarry Memorial opened May 17, 1965.

(E) Wawa, Lady Dunn General changed from a Private Hospital to a Public Hospital July 1, 1965.

.. Does not represent depreciation, but the purchase of furniture and equipment on an outright basis.

(1) Includes operating costs for Chronic Unit.

(2) Includes operating costs for Convalescent Unit.

(A) Toronto, St. Joseph's—The Quo Vadis School of Nursing is included.

(B) Toronto, New Mount Sinai—The Nightingale School of Nursing is included.

(C) Toronto, The Princess Margaret—The major proportion of expenditures relate to research and care of out-patients.

(D) Alexandria, Glengarry Memorial opened May 17, 1965.

(E) Wawa, Lady Dunn General changed from a Private Hospital to a Public Hospital July 1, 1965.

(F) Consists chiefly of non-allowable costs exclusive of unapproved costs.

(A) Alexandria, Glengarry Memorial opened May 17, 1965.

(B) Wawa, Lady Dunn General changed from a Private Hospital to a Public Hospital July 1, 1965.

***INDEX
TO PUBLIC HOSPITALS***

TABLES 1-6, 9, 10, 18-23

HOW TO USE THE INDEX

The following index has been designed to help the user of this Supplement find information about individual public hospitals quickly and easily. The stub of the index, lists the public hospitals alphabetically in order of location, while the columnar headings identify the number and contents of each table where specific information about a particular hospital can be found. The numbers appearing in the body of the table (with the exception of the first two columns) indicate the pages within the Supplement on which information about the public hospitals mentioned can be found.

The quickest way to find a particular item of information about a specific hospital is to look first in the index for its location, name and **bed size**, and then for the table description and Supplement page number. Turn to the appropriate page number within the Supplement and look down the **rated bed column**, which is arranged in descending order by size, until you spot the number of beds (and the hospital) you wish to find. The relevant information you wish to have will be contained on the same row.
